## BIM-MEP<sup>AUS</sup> Revit Template – May 2023 Updates

---

The BIM-MEP<sup>AUS</sup> Revit Template has been improved with the following updates:

- Added turning vanes to Rectangular Duct Tee
- Reduced line weight of Pipe, Duct, Conduit & Cable Tray centre lines to pen 1
- Adjusted all line weight thicknesses for 1:50 & 1:100 scale. Thickness reduced to align more closely to traditional drafting pen weights.
- Added a new square mitred offset duct fitting
- Added new "BMA Electrical Legend" view
- Changed name of existing "BMA Legend" view to "BMA Mechanical Legend"
- Square take off ducts adjusted to have the Rectangular Tap fitting assigned in the routing preferences instead of the shoe fitting.
- Rectangular Tap fitting fixed so as the primary connector is set correctly.
- Rectangular Tap & Shoe fittings adjusted so that the Extension, Flange Size & Flange Thickness parameters are instance not Type parameters.
- Added new round Y duct fitting.
- New damper schedules added.

### Generic Content additions

- New generic electrical content released and available on website within the generic content page
- All generic fire dampers upgraded and saved out individually within the generic content page
